TD04- Credit Note template

Key Differences from TD01 (Invoice)

- **TipoDocumento:** TD04 instead of TD01
- **DatiFattureCollegate:** This section is **mandatory** for credit notes — it links the credit note to the original invoice being cancelled or corrected. Without it, the credit note cannot be matched in the system
- **Line items must mirror the original invoice** — same products, same codes, same prices. For a full cancellation, use the same quantities. For a partial correction, adjust only the quantities being credited
- **ImportoTotaleDocumento** reflects the total amount being credited back, not a new charge

```
<?xml version="1.0" encoding="UTF-8"?>
<!--
=====
TEMPLATE: TD04 - NOTA DI CREDITO (CREDIT NOTE)
=====
Amazon constants are pre-filled. DO NOT modify them.
Fill in all fields marked with [ ] brackets.
Remove all comments before submitting to SDI.
=====
USE THIS WHEN: You need to cancel or partially correct
a previously issued invoice (TD01).

Quick Checklist Before Submitting TD04

- **TipoDocumento** is set to TD04 (not TD01)
- **DatiFattureCollegate** contains the exact original invoice number and date
- **Amazon entity name**: AMAZON EU SARL, SUCCURSALE ITALIANA — unchanged
- **CodiceDestinatario**: Same destination code as the original invoice
- **Line items** match the original invoice (same EAN/ASIN, descriptions, prices)
- **PO number** matches the original invoice's PO
- **ImportoPagamento** matches **ImportoTotaleDocumento**
